

PHILIPS

Refinity

Short-tip rotational
IVUS catheter

**Designed to meet
the needs** of your most
complex PCI procedures

With exceptional deliverability, 5F guide compatibility and 45 MHz high resolution image, **Refinity ST¹** is designed to meet the needs of your most complex PCI cases.

Exceptional deliverability

- Large 0.026 inch Asahi Intecc drive cable for enhanced pushability
- Smooth proximal to midshaft transition
- GlyDx hydrophilic coating for enhanced pushability and trackability
- Soft and flexible tip facilitates distal access

0.026"

Improved deliverability,²
crossing challenging lesions
with ease

Refinity insertion and recovery forces are significantly lower ($p < 0.0001$) than OptiCross²

1. This product is not available in all markets.

2. Data on file at Philips. Bench testing was conducted with three rotational IVUS catheters: Refinity, Revolution, Opticross through a tortuous model.

Low profile, 5F guide compatibility

	Refinity	Revolution	OptiCross*
Imaging window profile	3.0 F	3.2 F	3.15 F
Distal shaft profile	3.0 F	3.2 F	3.15 F
Proximal shaft profile	3.0 F	3.5 F	3.15 F
Tip entry profile	0.025"	0.022"	0.026"
Maximum guide catheter sheath size	5F (ID \geq 0.056")	6F (ID \geq 0.064")	5F (ID \geq 0.058")

* Source: <http://www.bostonscientific.com/en-EU/products/imaging-systems/opticross-coronary-imaging-catheter.html>

Refinity fits through all 5F guide catheters and is radial access appropriate

45MHz high resolution image

- Clear, crisp images for accurate coronary vessel interpretation and assessment
- Helps assess lesion anatomy for accurate stent sizing and placement
- Hi-Q imaging allows you to customize your image to better identify lumen features

Multi-modality choice

Philips Image Guided Therapy's choice platform provides customers with a wide range of solutions for multiple preferences and procedure types:

- Digital IVUS
- Rotational IVUS
- Peripheral IVUS
- FFR pressure wires
- iFR modality
- Advanced software and interfaces
- Multiple system solutions

Compatible with the SpinVision automatic pullback device

- Long 15 cm, smooth automatic pullbacks facilitate accurate vessel and lesion measurements
- LED display provides pullback position information with accuracy to 0.1 mm
- Maximum pullback accuracy facilitates clinical research and trials
- Manual pullback option gives more control where needed

Technical specifications

Dimensional attribute	Specification
Imaging core pullback length	15 cm
Catheter working length	135 cm
Proximal shaft profile	3.0F (0.39")
Guide wire compatibility	0.014"
Guide catheter compatibility	5F (ID \geq .056")
Imaging window profile	3.0F (.39")
Monorail length	15.5 mm
Transducer to tip length	20.5 mm
RO marker to tip length	5 mm
